

# Tip sheet for radio announcers

To be given to the radio personnel at your local radio station who report on the daily traffic. These tips can be mentioned as part of their traffic reports as a reminder to motorists.

- SLOW DOWN, when passing emergency services personnel working on the road...and give them room to work. Everybody deserves to return home safely.
- Motorists must slow to 60 km/h or less if the posted speed is lower when passing emergency vehicles or tow trucks are stopped with their lights flashing. The fine for speeding in these areas will be doubled.
